René Descartes High School — Champs-sur-Marne, France

September 2017 - July 2018

Personal Projects

Bumble B - Mobile Application for Remote Control Car — September 2024

Link: [Bumble-B](#)

Developed as part of my final year project, Bumble B is a mobile app used to control a small car equipped with an ESP32 module provided by the school. The app allows for controlling various parameters such as speed, trajectory, and retrieving data and statistics.

Bitjustu - AI-powered Image Editing Application — November 2023

Link: [bijutsu.app](#)

Bitjustu is a project I developed to practice using authentication tokens in a front-end application. The app allows users to modify images by submitting textual requests. For this, the API from [Replicate](#) is used to translate these instructions into visual changes on the image.

EcoMap - Interactive Map — July 2023

Link: [figma.com/ecomap](#)

EcoMap is an application prototype created on Figma in collaboration with my classmates for our first-year final project. The app aims to raise awareness and inform users about ecology and environmental events in their region using an interactive map. This project allowed me to enhance not only my UX/UI design skills but also my project management abilities, especially in team coordination and workflow management.

Calculator - Application built with React — October 2022

Link: [calculatrice-react.app](#)

This project involved developing a calculator using React, with the goal of exploring the framework's fundamentals while testing my self-taught development skills. It served as an excellent starting point to immerse myself in the React ecosystem and solidify my web development foundation. It also helped me improve my self-directed learning methodology.

Hobbies

- Judo : A discipline that taught me perseverance, discipline, and respect.
- Cooking : A field that broadened my understanding of culinary traditions.
- Fashion : Allows me to express my creativity through my personal style.
