Tools / DevOps :	Git, Docker, Postman, Vercel, Render, Claude, Cursor
Mobile :	Swift, SwiftUI, React Native, Expo
Project Management :	Scrum, Agile
Spoken languages :	French (native), English (B2)

Professional Experience

Fullstack Developer

January – May 2025

SFR Business | Telecommunications | Champs-sur-Marne, France

Stack: TypeScript, React, Tailwind CSS, Cursor, Node.js

- Partial frontend architecture redesign to improve maintainability and internal experience.
- Migration from vanilla JavaScript to React with component redesign. Automated podcast integration via semantic analysis.
- **Results** : reduced response times, smoother application for business teams.

Front-end Developer

October 2022 – October 2024

Konbini | Online media | Paris, France

Stack: JavaScript, Next.js, Tailwind CSS, GraphQL, WordPress

- Homepage redesign to boost engagement and modernize the interface.
- Integration of partner advertising banners (+15% revenue increase).
- Created a dynamic Twitch embed with real-time detection.
- Multi-author management: automatic contributor display to simplify editorial production.
- **Results** : 25% increase in monthly traffic and reduced page load times.

Junior Web Developer

French Innov | Digital solutions company | Stains, France

April 2021 - August 2022

Stack: JavaScript, React, Bootstrap

- Custom showcase websites for restaurateurs, focused on ergonomics.
 - Updated interactive features on ordering kiosks to improve customer experience.
 - On-page SEO optimization, contributing to a 40% increase in organic traffic.
 - **Results** : better online visibility and increased client satisfaction.
-

Personal Projects

(Open Source Contribution) Spotr — Mobile app for photographers

- **Stack:** Swift, Node.js, GraphQL, Firebase
- Spotr allows photographers to spot and share photo locations. I contribute to the backend rework, complex and sprawling, to simplify maintenance and allow non-technical teams to manage parts of the app via Firebase services.

Lift Up — Smart weightlifting tool

- **Stack:** TypeScript, Go, Gin, React Native, Expo, Supabase
- Lift Up is a mobile app I develop solo from A to Z to deepen my technical skills and discover new facets of development. It enables weightlifters to create personalized programs, convert weights, and track their BMI, combining performance and ergonomics.

Bumble B — Remote controlled car

- **Stack:** TypeScript, React Native, Expo
- Mobile app to control a car equipped with an ESP32 module, with speed and trajectory control. It also displays real-time embedded technical data for precise tracking.

Bitjustu — Image editing with AI

- **Stack:** JavaScript, Next.js, Replicate API, Vercel
- Bitjustu is a web app I quickly developed to experiment with AI integration in a real project. It allows image generation and editing via AI, with a simple, fast, and responsive interface suitable for all users.

Education

Bachelor: Web Developer

HETIC — Montreuil, France

2021 - 2024

Minor in Arts and Sciences

University of Montreal — Montreal, Canada

2018 - 2019
