Mobile :	React Native, Expo
Database :	PostgreSQL, Supabase
Cloud / Hosting Platforms :	Vercel, Render
Project Management :	Jira, SCRUM, Agile Method
Languages spoken :	French, English

Professional experience

Frontend Developer

10 / 2022 - 10 / 2024

Konbini — Online media — Paris, France

Stack : JavaScript, Next.js, GraphQL, WordPress

- Redesign of the homepage to maximize appeal and engagement.
- Integration of advertising banners with partners, increasing revenue by 15% via better placement logic.
- Automated podcast integration via semantic analysis.
- Implementation of a dynamic Twitch embed with real-time live detection.
- Multi-author management with dynamic article display.

Web Developer

04 / 2021 - 08 / 2022

French Innov — Digital solutions company — Stains, France

Stack : JavaScript, React, Bootstrap

- Design and development of customized websites for restaurateurs.
 - Implementation of interactive functionalities on order terminals for a fluid UX.
 - On-page SEO optimization for better referencing.
-

Personal projects

Lift Up — 02 / 2025

Lien : [Lift Up](#)

- **Stack : React Native, Expo, Gin**

Lift Up is a mobile application designed for bodybuilding and fitness enthusiasts. Its aim is to optimize your workouts by allowing you to create a personalized program, instantly convert weights and track your BMI.

Bumble B - Remote car control application — 09 / 2024

Link : [Bumble-B](#)

- **Stack : TypeScript, React Native, Expo**

Developed for my final-year project, Bumble B is a mobile application for controlling a car fitted with an ESP32 module. It manages speed control, trajectory and data retrieval.

HairSwift - Hair salon management application — 04 / 2024

Link : [Bumble-B](#)

- **Stack : JavaScript, Go, React**

HairSwift is an application designed to explore Go development and optimize the management of a hair salon (appointments, employees, services). This project enabled me to strengthen my backend skills and deepen my understanding of frontend-backend integration.

Bitjustu - AI-based image editing application — 11 / 2023

Link : [bijutsu.app](#)

- **Stack : JavaScript, Next.js, Replicate**

Bitjustu is a project I designed to explore front-end token authentication and AI integration in a web application. The application allows users to modify images by providing text prompts. These instructions are processed via Replicate's API, which generates the visual transformations in real time. This project allowed me to deepen my understanding of token authentication, image processing pipelines, and AI integration in production apps.

School career

Bachelor's degree in Web & Mobile Design and Development

09 / 2022 - 09 / 2024

HETIC — Montreuil, France

Key Strengths
