Professional Experience

Front-end Web Developer   October 2022 - October 2024
Konbini — Online Media — Paris, France

- Technologies used: JavaScript, TypeScript, Next, GraphQL
- Developed, implemented, and maintained new features for Konbini 's website.
- Redesigned the homepage to enhance its attractiveness.
- Optimized the user interface to improve usability and accessibility, leading to increased user engagement.
- Set up and integrated banners and advertising content, in collaboration with external partners, contributing to an increase in advertising revenue.
- Improved on-page SEO through adjustments to HTML tags, resulting in better search engine ranking.

Web Developer   April 2021 - August 2022
French Innov — Digital Solutions Company — Stains, France

- Technologies used: JavaScript, React, Bootstrap
- Designed and developed custom showcase websites for restaurant owners, highlighting their visual identity, menus, and special offers.
- Implemented and monitored new interactive features on self-service kiosks, ensuring a smooth and intuitive user experience.

Education

Bachelor's Degree in Web and Mobile Design and Development   September 2022 - September 2024
HETIC — Montreuil, France

Diploma of advanced technology in software development   September 2020 - September 2022
Institut F2I — Vincennes, France

High School Diploma in Management and Information Systems   September 2017 - July 2018
Lycée René Descartes — Champs-sur-Marne, France

Personal Projects

Bumble B - Mobile app for controlling a remote-controlled car — September 2024

- Link : Bumble-B

Developed as part of my final year project, Bumble B is a mobile application that allows users to control a small car equipped with an ESP32 module provided by the school. The app manages various parameters such as speed control, trajectory, and data collection.

Bitjustu - AI-powered image editing app — November 2023
- Link : bijutsu.app

`
Bitjustu is a project I created to practice using authentication tokens in a front-end application. The app allows users to modify an image by providing text-based commands. Replicate's API is used to transform these instructions into visual changes applied to the image.

EcoMap - Interactive map — July 2023
- Link : figma.com/ecomap

EcoMap is a mockup of an application designed on Figma in collaboration with my classmates for our first-year final project. This app aims to raise awareness and inform users about environmental events in their region through an interactive map. This project allowed me to enhance my UX/UI design skills and develop project management skills, particularly in team coordination and workflow management.

Calculator - Application developed with React — October 2022
- Lien : calculatrice-react.app

This project involved developing a calculator using React to explore the fundamentals of the framework while testing the skills I had acquired through self-study. It was an excellent starting point for immersing myself in the React ecosystem and consolidating my web development knowledge. It also helped me develop a more effective self-learning methodology.

Hobbies

- **Judo** : A discipline that taught me perseverance, rigor, and respect.
- **Cooking** : A field that broadened my understanding of gastronomic traditions.
- **Fashion** : Allows me to express my creativity through my style.
- **Reading** : A way to develop my critical thinking.
