Frontend Developer

Ryan PINA-SILASSE NGAMI, 23

+33 6 16 07 40 54 — ryanpinas77@gmail.com — linkedin.com/in/ryan-pina-silasse — github.com/N95Ryan

Champs-sur-Marne, France

Frontend web developer with 2 years of professional experience under my belt. I've had the opportunity to work on various projects using technologies such as Typescript, React, and Go. My interest in new technologies and my ability to adapt quickly allow me to design modern and pleasant interfaces.

Technical skills

Languages :	Javascript, Typescript, Sass, Go

HETIC, the internet school of excellence — Montreuil, France

Courses : Web and mobile design and development, Object-oriented programming, 3D Web, Project management

---

Personal projects

DisGOvary - Database Management   — February 2024
Link : disgovary.app

The DisGOvary project is a fullstack project set up to give a novice developer a better understanding of front and back working environments. The aim of the application is to manage a database in the browser, in order to better visualize the data managed by the server. It has been developed using React, Go and MySQL.

Bitjustu - AI Image Editor   — November 2023
Link : bijutsu.app

I created this project to practice integrating tokens into a front-end project. It consists of an interactive application that lets the user edit an image via lines of text. For this, I used the Replicate API. The rest of the project was carried out using Next.js and Tailwind.

Tic-Tac-Toe - Interactive Game   — September 2023
Link : tic-tac-toe.app

This project is a web application developed to illustrate the fundamentals of JavaScript programming and DOM manipulation.
The aim of the application is to allow users to play Tic-Tac-Toe directly in their browser, while demonstrating JavaScript's state management and user interaction capabilities.

EcoMap   — July 2023
Link : figma.com/ecomap

This mock-up application was created in collaboration with fellow students as part of our end-of-first-year thesis. The application uses an integrated map to consult a list of events related to ecology and the environment around you. It was with this project that I really developed my project management skills.

React Calculator   — October 2022
Link : calculatrice-react.app

As the name suggests, it's a calculator made with React following a tutorial.The primary aim of this project was to introduce me to the framework, and secondly to test my self-taught development skills. Being a very autonomous person, it was a relevant project for me.

Activities and leisure

- Judo: A discipline that has taught me rigor, perseverance and respect.
- Interest in fashion: Following current trends and expressing my creativity through my clothing style.
